IEEE's Mission

To foster technological innovation and excellence for the benefit of humanity

1884: The American Institute of Electrical Engineers is founded

A small group of individuals met in New York and founded the AIEE to advance the new field and represent the US at the 1884 International Electrical Exhibition in Philadelphia.

Norvin Green,
President
of Western Union
Telegraph and first
president of the AIEE

Program of the 1884
International Electrical
Exhibition, Franklin
Institute, Philadelphia

Thomas Edison, one
of the founders of the
AIEE

1912: The Institute of Radio Engineers is founded

Radio, a new electrical technology, arose in the first decade of the twentieth century. With the new industry came a new society, IRE, modeled on the AIEE, but devoted to radio, and later increasingly to electronics.

1901
Guglielmo Marconi and **George Kemp** with equipment used in transatlantic wireless telegraphy

1912
Radio telegraph operators' communications with the sinking Titanic demonstrated the power of radio

1922
Triode vacuum tube inventor **Lee de Forest** with a radio

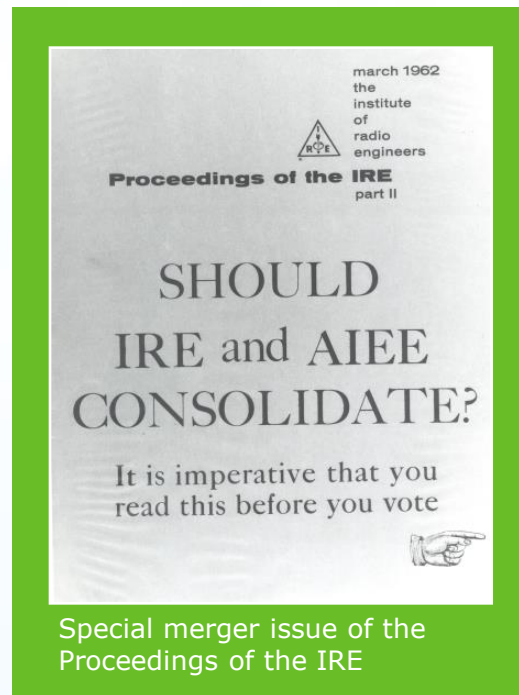

AIEE + IRE = IEEE

The idea that there should be one organization for all electrical engineers was an old one, and became more powerful as the profession expanded beyond its separate roots in power and radio. In 1962, the boards and memberships of the two institutes agreed to merge. On January 1, 1963, the Institute of Electrical and Electronic Engineers was born with 150,000 members.

1962

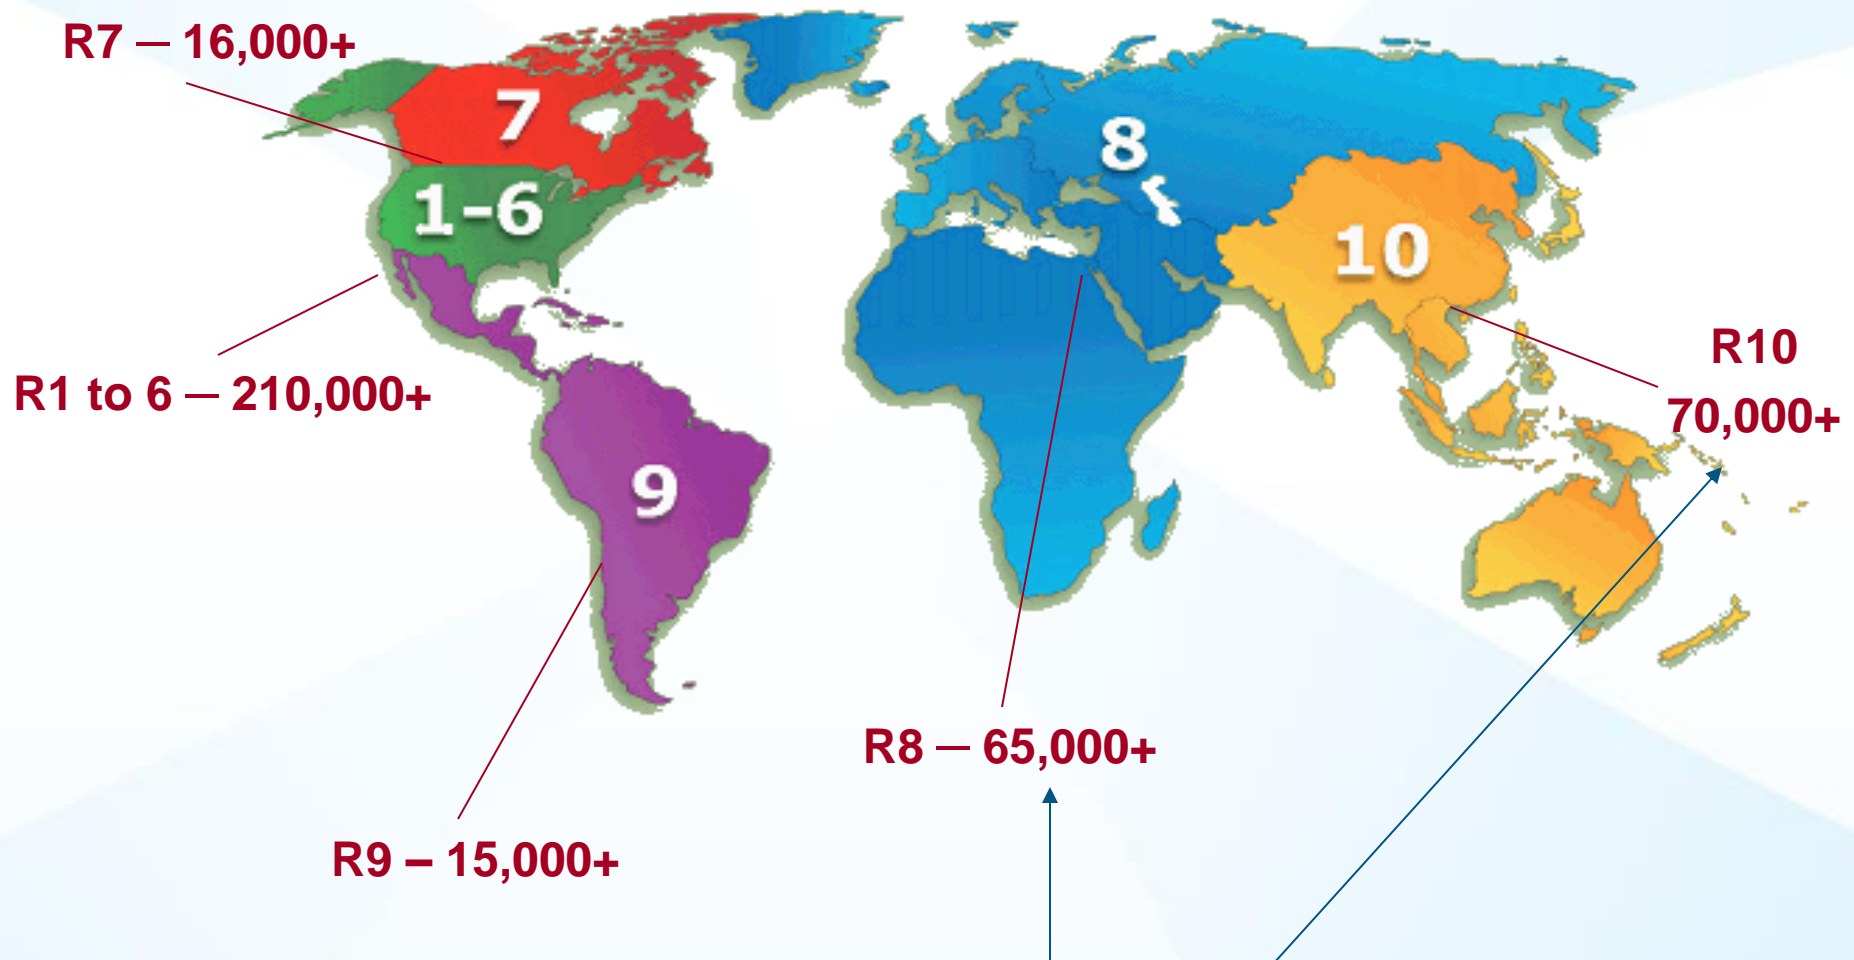

Symposium on the proposed merger, IRE National Convention

Special merger issue of the Proceedings of the IRE

IEEE: An International Community

Reflecting the global nature of IEEE, R8 and R10 are now the two largest IEEE Regions

IEEE covers all areas of technology

More than just electrical engineering & computer science

OPTICS **RENEWABLE ENERGY** **PHOTONICS**
SEMICONDUCTORS **SMART GRID**
IMAGING **INFORMATION TECHNOLOGY**
COMMUNICATIONS **AEROSPACE** **CIRCUITS**
BIOMEDICAL ENGINEERING **ELECTRONICS**
LTE WIRELESS BROADBAND **NANOTECHNOLOGY**
OIL & GAS **CLOUD COMPUTING**
RF **CYBER SECURITY** **MEDICAL DEVICES**
