Are Bitcoin Prices Rational Bubbles?

Kazushi Funo

Professor of Economics, Ohio State University

E-mail: funo.1@osu.edu

Abstract: This paper examines the rationality of Bitcoin prices using a nonlinear time series model. The results show that Bitcoin prices are not rational. This finding is robust to various specifications and control variables. The implications for financial markets and policy makers are discussed.

1. Introduction

Bitcoin is a form of digital currency designed to be decentralized, transparent, and untraceable. Despite its promise, Bitcoin prices have been volatile and subject to fluctuations.

Keywords: Bitcoin, Prices, Rationality, Nonlinear Time Series
