An Analysis of Current Grey Literature Document Typology

Petra Pejšová, National Technical Library, Czech Republic
Marcus Vaska, University of Calgary, Canada

GL12, DECEMBER 6-7, 2010

Defining Typology in the Grey Literature

- Typology in 1845: “a doctrine holding that things in Christian belief are prefigured or symbolized by things in the Old Testament”
- Typology in 2010: “a study of or analysis or classification based on types or categories.”
- The representation of grey literature in numerous types and formats can indeed create the appearance of numerous aspects of grey literature that do not appear to hold a common purpose with each other, hence the need for a standard typology for this material to put everything in its place.

Project Goals

- Clear GL typology
- Structured GL typology
- Open discussion about GL typology
- Prepare data for machine readable format

Source Typologies for Analysis

Analysis of GL Typologies

- 241 terms in total used to describe GL document types
 - 133 terms from GreyNet
 - 17 subject areas in OpenSIGLE
 - 1988 items in ROAR, organized into 9 repository types
- Document types have been grouped into 3 levels (primary, secondary, tertiary)
 - Primary: 39%
 - Secondary: 49%
 - Tertiary: 12%
- The above levels dispute the traditional notion of GL as consisting of mainly primary literature (theses, reports, and government documents)

Aspects in GL Typologies
